WHY CLIMATE CHANGE?

1. What words come to mind when you think about climate change?
2. What does climate justice mean to you?

„The impacts of climate change will not be borne equally or fairly, between rich and poor, women and men, and older and younger generations.“ **Climate change** is not only an issue of environmental conservation, but also an issue of justice and human rights. While those most responsible for climate change are relatively insulated from its impacts, it is those who have contributed the least to it who are likely to feel its effects the most.
